

## AMENDMENT TO THE SPECIFICATION

Please amend the Abstract of the Disclosure (page 31, first paragraph) as follows:

*Q1*

~~This invention provides improved apparatus and methods for completing a subterranean zone penetrated by a wellbore. One embodiment of the present invention is a~~ A wellbore completion comprising includes a plurality of longitudinal gravel pack sections disposed within a well, the gravel pack sections are being capable of imposing a predetermined substantially radial flow restriction upon fluid production flowing radially through the gravel pack section. At least one of the gravel pack sections creating creates a radial flow restriction that is different from the radial flow restriction of at least one other gravel pack section. The gravel pack sections ~~can~~ comprise may comprise graded gravel material having an effective permeability within a predetermined range when placed in the well.
